

Mathematics 9

CH6: In-class Final Review

Using a pattern to make an equation:

Describe the pattern in words:

Determine the equation that relates the size number (x) with the number of squares used (n):

How many squares will there be in Size 8?

Which size has 65 squares?

Is there a size with 103 squares? How do you know?

Graph the relation:

Interpolation and Extrapolation:

Use the graph below to answer the following questions:

Graph of a Car Journey

- 1) Approximately how far has the car travelled after 1.5 hours?
- 2) How long did it take the car to travel 200 km?
- 3) What process was used to answer #1 and #2?

How long did it take the car to travel 450 km? The graph below has been extended in order to answer this question. What process is being used?

Graph of a Car Journey

Mathematics 9

CH6: In-class Final Review

Horizontal and vertical lines:

Equations: $y = 8$

$x = -3$

Graphs:

Tables of values:

Time, t (s)	Distance, d (m)
0	6
30	6
60	6
90	6
120	6

Distance, x (m)	Height, y (m)
1.5	2.5
1.5	3.0
1.5	3.5
1.5	4.0
1.5	4.5
